## **DETAILED ACTION**

### ***Priority***

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 10/667,658, filed on 09/23/2003.

### ***Specification***

2. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Abstract of the invention exceeds 150 words in length. Appropriate action is required.

### ***Allowable Subject Matter***

3. Claims 1-9 allowed. The following is an examiner's statement of reasons for allowance: The following is a statement of reasons for the indication of allowable subject matter:

A comprehensive search of prior art of record failed to teach, either alone or in combination, an apparatus comprising; a clock synthesizer for outputting a plurality of sampling clocks, a timing thereof being adjusted by receiving an external clock

synchronized with the external data signal; an over-sampler for over-sampling a first equalized external data signal and a second equalized external data signal in synchronization with the sampling clocks; a multiplexer for multiplexing the outputs of the over-sampler in response to preceding outputs of the multiplexer, which serve as select signals for the multiplexer, to thereby attain multiplexer decision results; and a phase detector for deciding the timing of the sampling clocks by analyzing the multiplexer decision results.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. (US 2003/0195645) (2004/0001567) (5,844,436) (4,972,430) (6,396,329).

5. This application is in condition for allowance except for the following formal matters:

See above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
